

SAINT ANNE'S LEARNING ORGANISER –GEOGRAPHY- YEAR 3- POLLUTION

KEY QUESTION: How is pollution affecting us?

What should I already know?

There are 7 continents and I can name them. The United Kingdom is made up of 4 countries. I can name them and know that I live in England. I live in the city of Birmingham/Walsall. I know what the environment is and that we need to protect the environment. I can name the world's oceans. I understand that litter/ smoke/ waste/ plastic are harmful to my environment and we need to do something to stop this.

Which questions will I be able to answer by the end of the topic?

What does pollution mean?

Which types of pollution are there?

How can we record levels of pollution in our local area?

What are the causes and consequences of different types of pollution?

What can I do to stop pollution affecting me and my local area?

Why might there be more or less pollution in different parts of the country/world?

Key dates/facts/people:

Air pollution is the pollution of air by smoke and harmful gases, Many of the world's large cities today have bad air quality which causes health problems for animals and humans. Plastic pollution can now be found on every beach in the world. 100,000 marine mammals and turtles and 1 million sea birds are killed by marine plastic pollution annually.

Urban

What will I use to investigate this topic?

Maps, aerial maps and plans, atlases, globe, photographs,

Google earth, Digimaps,

Local fieldwork studies

Weather reports on air quality
